

Awake Background IP and Dependency Schedule

Version 0.1 | 2026-10-14

These documents are general templates, not legal advice. Before using any document for any real-world purpose, every party must have their own independent legal counsel review and approve it for their circumstances and applicable law. Do not sign, rely on, or otherwise use a document without that approval. No attorney-client relationship is created.

Record actual ownership, exclusions and licenses for contributed materials.

Reference edition. Complete all fields, choose every alternative, reconcile companions and remove drafting instructions before execution. The separate fill-in edition omits this publication introduction.

Commercial Terms

Parties/main agreement: [names/version]. Schedule date and custodian: [details].

Asset record

Repeat for each item: [description/version; actual owner; contributor chain; preexisting/new work; assignment or license instrument; allowed uses/modifications/sublicenses; restrictions; consent evidence; liens/prior grants; transfer date]. State none where genuinely absent, rather than leaving an ambiguous blank.

Dependencies

[Open-source components/licenses; third-party software; datasets; AI models/tools; generated-material rights limits; disclosure/security restrictions]. Record intended uses against actual rights. No ownership is inferred merely from possession or AI-assisted creation.

Control and gaps

[Company repository/domain/cloud control evidence; handover owner/date; unresolved rights and remedial action]. Never include passwords, API keys or private customer data. Identify prior-business assets separately. This inventory alone is not an assignment or license.
